

HQ 30 / HQ 35P

Hand strippers for enamel insulated round wires and flat copper

Description:

The HQ 30 and HQ 35P hand strippers are used for the stripping of enamel insulated round wires and flat copper between two rotating steel wire stripping brushes.

The distance of the stripping brushes can be adjusted steplessly to adapt to your requirements without any problems.

The counter-rotating stripping brushes in the HQ 30 pull the wire into the unit, unlike the HQ 35P. Due to co-rotating brushes in the HQ 35P, there are no tensile forces on the wire, which means that profiled copper can also be stripped without fear of the material being pulled into the machine.

HQ 30

Hand stripping machine for wires 0,15-3mm,
230 V (115 V) 50 Hz, weight 2.1 kg,
Standard brushes: 30 x 20 x 6 x 0.15 mm

Brush type	for wire thickness
30 x 20 x 6 x 0,10 mm	0,15 – 0,60mm
30 x 20 x 6 x 0,15 mm	0,40 – 1,00mm
30 x 20 x 6 x 0,20 mm	0,60 – 1,50mm
30 x 20 x 6 x 0,25 mm	0,80 – 2,00mm
30 x 20 x 6 x 0,30 mm	1,00 – 3,00mm

HQ 35P

Hand stripping machine for wires 1,5-6mm and flat wires 1-6mm,
230 V (115 V) 50 Hz, weight 2.4 kg,
Standard brushes: 35 x 20 x 6 x 0,15 mm

Brush type	for wire thickness
35 x 20 x 6 x 0,10 mm	1,00 – 2,00mm
35 x 20 x 6 x 0,15 mm	1,50 – 2,50mm
35 x 20 x 6 x 0,20 mm	2,00 – 3,00mm
35 x 20 x 6 x 0,25 mm	2,50 – 4,00mm
35 x 20 x 6 x 0,30 mm	3,00 – 6,00mm
