

Isol-EX

Electrical hand-held stripping device for enamelled copper wires

Description:

Easy to handle device for stripping enamelled copper wires as well as braided wires. The Isol-EX is operated by a 230 V DC motor and is connected directly to the 230 V mains. A 110 V / 60 Hz version is also available.

Three rotating carbide blades are mounted in the blade head. They close depending on the rotation speed, due to the centrifugal force. Continuous adjustment makes it possible to precisely set the required speed, adjusting the blades to the respective diameter.

Variants:

The Isol-EX is supplied in two different blade head versions:

Type 02: diameter 0.2 – 1.5 mm

Type 03: diameter 0.3 – 4.0 mm

Technical specifications:

- Stripping length:..... max. 32 mm
- Stripping distance: 3 mm
- Power:..... 230V / 50Hz oder 110V / 60 Hz
- Capacity : 18 Watt
- Legth:..... 210 mm
- Diameter:..... 50 mm
- Weight:..... 680 g
