

Simplex 30

Sheath stripping device with hand lever, up to an outside diameter of 30 mm

The Simplex 30 is a practical and easy-to-use hand-held device for stripping the sheaths of cables and stranded wires up to an outside diameter of 30 mm. Also suitable for flat cables.

Features

- easy handling by changing knives without tools (plug system)
- light weight
- robust construction
- Device can be easily attached in many places
- no electrical or pneumatic connection required
- Special knife according to sample on request (for example for flat cables)

Functionality:

Insert the cable between the knives, the cable is clamped by pulling the hand lever, the knives cut in, and the insulation of the cable is removed. The stripping length can be precisely adjusted using an adjustable stop. Plug-in knives guarantee a changeover to different cable diameters in a matter of seconds. This makes the use of a SIMPLEX economical even for small quantities.

Technical specifications:

Outside diameter of the cables and strands..... max. 30 mm
 Sheath stripping length (full strip)
 in one operationmax. 150 mm
 Sheath stripping length (part strip): > 150 mm
 Dimensions (WxDxH): 340 x 130 x 180 mm
 Weight:.....7,0kg
